

# NAMUR VALVES

## Single solenoid

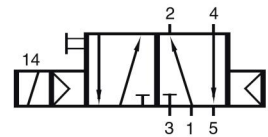

### MNH510711

Solenoid valve with Namur interface to be directly mounted on a pneumatic actuator. The valve is equipped with manual override in case of power failure. Delivery includes screws, cable connector and silencers mounted on the exhaust ports.

#### Technical Features

Type:	5/2-way, air spring
Pressure range:	2-10 bar
Connection:	Female thread G 1/4"
Standard voltages:	24, 110, 230V/50-60Hz ±10% 12, 24, 110VDC ±10%
Power consumption:	DC - 3W. AC - 5VA
Temperature range:	DC -10...+60°C. AC -10...+50°C
Flow capacity:	1250NI/min
Air quality:	According to ISO 8573-1:2010:7-4-4
Body:	Aluminium, anodised
Spool:	Stainless steel 1.4104 (AISI430F)
Sealings:	NBR
Electrical connection:	Connector according to DIN43650-A (Included)
Duty rating:	100% ED-VDE0580
Protection:	IP65 according to DIN EN 60529
